EDUCATION

- Indian Institute of Information Technology Lucknow Aug 2024 – April 2028
Bachelor of Technology in Computer Science Lucknow, Uttar Pradesh, India
 - GPA: 9.15/10.0 | [Transcript](#)
 - Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Web Development, Computer Networks

OPEN SOURCE CONTRIBUTIONS

- Python Package – **langchain-google-classroom** GitHub | PyPI
Tech Stack: Python, LangChain, Google APIs, PyPI, GitHub Actions, PyTest Mar 2026 – Present
 - Built and published a LangChain integration to convert Google Classroom data and Drive attachments into structured documents for RAG and semantic search.
 - Designed a modular ingestion pipeline with lazy loading, pluggable parsers, and metadata normalization.

PROJECTS

- EduVerse – Multi Agent Privacy First Tutoring System Live | GitHub
Tech Stack: Python, LangGraph, Gemma 4, Next.js, MongoDB, FastAPI May 2026
 - Engineered a **LangGraph-based multi-agent tutoring system** with planner, critic, validator, and quiz-generation workflows using Gemma 4.
 - Built a **hybrid RAG pipeline** using MongoDB BM25 retrieval, vector search, and Cohere reranking for grounded responses over classroom materials.
 - Fine-tuned **Gemma 4** using **Direct Preference Optimization (DPO)** by collecting rejected vs revised agent outputs from validator-driven revision loops.
- SevakAI – AI Powered Volunteer Coordination System Live | GitHub
Tech Stack: Flutter, Firebase, Gemini API, Cloudinary, OpenStreetMap Apr 2026
 - Built a **Gemini-powered disaster response platform** for multimodal emergency triage, volunteer coordination, and real-time crisis tracking.
 - Developed an **AI-based volunteer matching engine** using skill, distance, workload, and GPS-based scoring with Firestore transaction-safe task assignment.
 - Implemented **cross-NGO escalation workflows**, live geospatial heatmaps, and multilingual voice-to-structured-report pipelines using Flutter, Firebase, and Gemini 2.5 Flash.

ACHIEVEMENTS

- Secured First Place in **Hack4Good by Notion** by developing impactful solutions at a state-level hackathon.
- Achieved **1st place** in a Kaggle competition by building a CNN-based **skin lesion classification** model.
- Achieved **Specialist** rank on **Codeforces** (max rating: **1448**).
- Rated **3-star** on **CodeChef** (max rating: **1702**).
- Solved **750+ problems** across [LeetCode](#), [Codeforces](#), [CodeChef](#), and [GeeksforGeeks](#).

SKILLS

- Languages:** Python, C, C++, JavaScript, SQL, Bash
- Machine Learning:** Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, OpenCV, Hugging Face
- Frameworks:** PyTorch, TensorFlow, Keras, FastAPI, Streamlit
- Databases:** MongoDB, MySQL, PostgreSQL, Pinecone
- Tools & Platforms:** LangChain, LangGraph, LangSmith, Docker, Git, Anaconda, Jupyter Notebook

ROLES AND RESPONSIBILITIES

- Member, Machine Learning Wing – **AXIOS, IIIT Lucknow**: Delivered machine learning sessions to **200+** students.
